**St. Norbert College**  
**Classroom:** Cofrin 201  
**Class Schedule:** MWF 8:30-9:30 am  
**Class site:** classroom.google.com

**GOALS:** The main goal of this course is to learn how to take responsibility for some of our core, organizing beliefs – our beliefs about what it means to be human. Doing this involves clearly stating these beliefs (which often go unstated), examining our rationales for them, and seeing if our rationales hold up in light of our other core beliefs (about God, freedom, or morality) and conflicting views of human nature. This is a distinctively philosophical project, which requires developing and analyzing arguments, clearly stating key ideas, and examining the sources of our ideas. We will organize our efforts around central texts in the Western philosophical tradition, learning how to analyze what these texts say and using them to compare and evaluate our own beliefs.

**OUTCOMES:** We will pursue these goals with an eye to the following four outcomes:

- Articulation of core beliefs: You will be able to clearly and succinctly articulate your core beliefs about human nature, in both writing and verbal discussion, and using the philosophical readings we study.
- Developing and examining arguments: You will be able to clearly explain plausible rationales for your core beliefs about human nature, distinguishing your supporting reasons (or “premises”) from your core beliefs (or “conclusions”), and you will be able to evaluate the strength of your rationales, considering whether your premises are correct and to what extent they support your core beliefs.
- Reconstructing philosophical views: You will be able to reconstruct the main views about human nature presented in our readings, identifying and restating the main conclusions, identifying and restating the supporting arguments, and raising questions about the meaning and/or plausibility of these views.
- Comparing and evaluating core beliefs: You will compare your core beliefs to the views presented in our readings, considering whether and how they differ, explaining whether and how they present challenges to your own beliefs, and when they do, deciding how to respond to those challenges.

**REQUIREMENTS:** To achieve the main goals of the course, you will need to complete regular short written work (both in and outside of class), some of which will culminate in a paper, reading guides, and mid-term and final exams. More details ...

- Analytical Reflections: You will complete a short (~400 words), focused analysis of one of your and/or an author’s view about a specific question about human

nature every one or two weeks (depending on when other large assignments or exams are due). I will provide evaluation criteria and instructions.

- Paper: Based on your work in some of your analytical reflections, you will compose a 1200-word paper explaining your response to a challenge to one of your core beliefs about human nature. The criteria for this paper will be drawn from the evaluation criteria applied to your analytical reflections.
- Reading Guides: For many of our readings, you will complete short reading guides that raise 3-5 questions about the reading, which will prepare you for class discussion and other assignments and, more generally, help you to efficiently study the readings and use them to refine your own thinking.
- Class Contributions: Taking responsibility for our beliefs about human nature is a collective effort – we need to hear from others about what they think and, perhaps more importantly, hear others restate what we think. In each class, we will work together to answer important philosophical questions, both as a large group and in small groups. This will often involve written work turned in for credit.
- Exams: To cement the skills of disciplined thought that are paramount in this course, you will take a mid-term and final exam that will require you to revisit and tie together the concepts and arguments that are most important for helping us to refine and revise our core beliefs about human nature.

**GRADING:** Your grade will be determined by how well you satisfy the requirements, with 20% of your grade coming from the Analytical Reflections, 30% from the Paper, 10% from the Reading Guides, 10% from Class Contributions, and 30% from the exams. Some further details and policies:

- Grading Scale: A = 93%-100%, AB = 88%-92%, B = 83%-87%, BC = 79%-82%, C = 74%-78%, CD = 70%-73%, D = 65%-69%, F = 0%-64% (Note: I will round to the nearest whole percentage point.)
- Late/Rewrite Policy: You are expected to turn in all of your assignments on time, and they cannot be revised once they are turned in. That being said, life is hard, and so for one (and only one) of your Analytical Reflections, you can turn it in late (within one week of the original deadline) or rewrite it with no penalty (within one week of when you receive the initial grade). All other late work will receive a lowered grade, and some assignments will receive no credit if they are late.

If you encounter a personal emergency/illness or feel that your St. Norbert-sanctioned activity (concerts, sporting events, etc.) requires you to turn in an assignment late, you must let me know in person or by email at least 24 hours in advance (in the case of participating in St. Norbert activities) or within 24 hours following the deadline (in the case of a personal emergency or illness) in order to avoid late penalties. I will let you know if and to what extent your circumstances warrant avoiding the late penalty.

- Attendance, Punctuality, & Technology: You are expected to actively contribute to each class meeting. That being said, life is hard, and so you can miss one (and only one) class without a grading penalty. *All other absences will lower your total Class Contributions grade by 20%*. Keep in mind that being on time matters, because it's a part of respecting one another. Showing up for class late will negatively impact your Class Contributions grade.

Staying engaged matters, because it's a part of respecting yourself and one another. So, *using your computer in class for things other than notes, in-class activities, and course readings will be counted as an absence*. Any use of cell phones or similar technology will be counted as an absence. Some portions of class will require you to close/put away your computers.

If you encounter a personal emergency/illness or feel that your St. Norbert-sanctioned activity (concerts, sporting events, etc.) requires you to miss or be late to a class, you must let me know in person or by email at least 24 hours in advance (in the case of St. Norbert activities) or within 24 hours following the missed class (in the case of a personal emergency or illness) in order to avoid lowering your Class Contributions grade. I will let you know if and to what extent your circumstances warrant avoiding a lowered grade.

**ACADEMIC ACCOMMODATIONS:** In keeping with the St. Norbert College mission to help students develop their full potential, and in compliance with the Americans with Disabilities Act, the College provides supportive services to students with disabilities.
